

HTA/MSB/7/58
27 February 1958

Copy 4

MEMORANDUM FOR: ORS/I/CM

25X1A ATTENTION : [REDACTED]
FROM : HTA/MSB
SUBJECT : Location of Missile Assembly Plant and Swimming
Site in the Istra Area
REFERENCES : Requirement RP/HTA/E/R27-57

25X1 1. Your requirement seeks location of a swimming site visited
by [REDACTED] and another site allegedly seen by them and
reported by them to be a surface-to-air missile production facility.

2. Neither the swimming site nor the alleged production facility
can be identified on available aerial photography, perhaps due to cloud cover
and the extreme oblique angle of the coverage.

3. On the basis of information obtained [REDACTED] the
swimming site can be generally located on maps of the area, but available
ground photography does not permit pinpoint location of the swimming site.

25X1 4. [REDACTED] states that he went swimming first in the spring of
1951 and that an industrial installation could be seen approximately five
kilometers (km) to the southwest. Since other collateral information ob-
tained in late 1955 locates the Istra Missile Assembly Plant at 55° 51' 30" N -
36° 52' 05" E, which would be about four km WSW of the swimming site, [REDACTED]
25X1 [REDACTED] probably saw the Istra Missile Assembly Plant.
